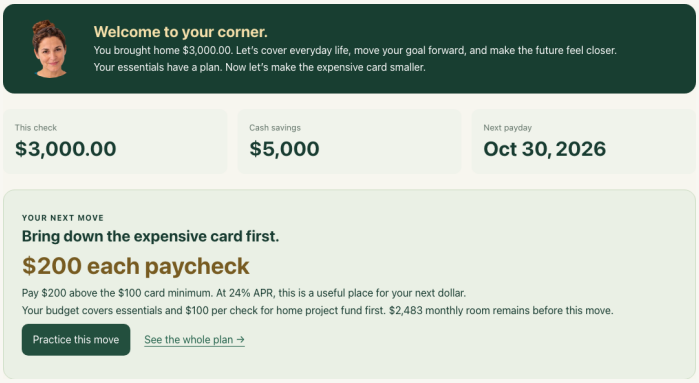
FIRE DEPARTMENTS & FIREFIGHTER UNIONS

A personal AI financial coach for your firefighters.

Connect shift work, overtime and benefits with the life each firefighter wants to build.

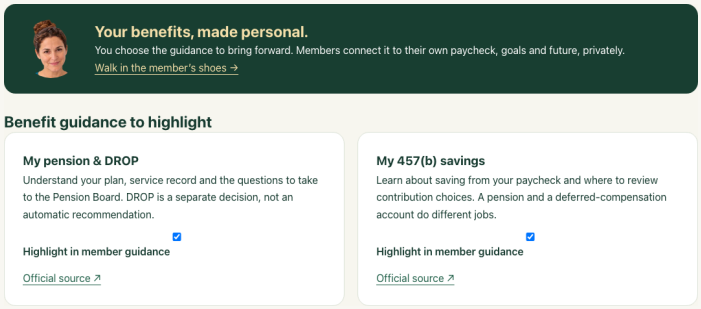
Valerie · your AI coach

FOR FIREFIGHTERS



Example coaching journey with made-up finances.

FOR YOUR ORGANIZATION



Example sponsor workspace with made-up data.

Make the next paycheck useful.

Understand a check, explore extra work and put the result toward a reserve, debt or a goal. Coach's Corner helps make the next choice easier to see.

Bring benefits into real life.

Connect reviewed pension and deferred-compensation resources to real questions. Keep employer coverage, union benefits and pension administration distinct.

Contract intelligence for the union.

Human-reviewed, not an automated contract audit or legal opinion. Payroll and pension administrators remain the authority for individual determinations. Review agreed pay and benefit sources together. For unions, review MOU provisions together. An account contact supports launch and correction.

Adoption insights for your team.

Sponsors see aggregate adoption under the agreed reporting scope. Participation is voluntary. Retention is a hypothesis to test.

A benefit for your whole workforce.

$10 per covered person per month, regardless of enrollment or use.
Private coaching, an account contact and aggregate adoption reporting.
Supported sources and onboarding are agreed before launch. Any organization-specific implementation work is confirmed separately.

Let's talk: Dave Coles | Founder | dave@moneybadger.us

Examples use made-up people and numbers, not a customer endorsement. Some capabilities are being built; supported scope and launch arrangements are agreed before launch. Educational digital coaching, not a human financial-adviser appointment. Educational, not financial advice.
We help you understand your money and build a plan that fits your life. You stay in control.
