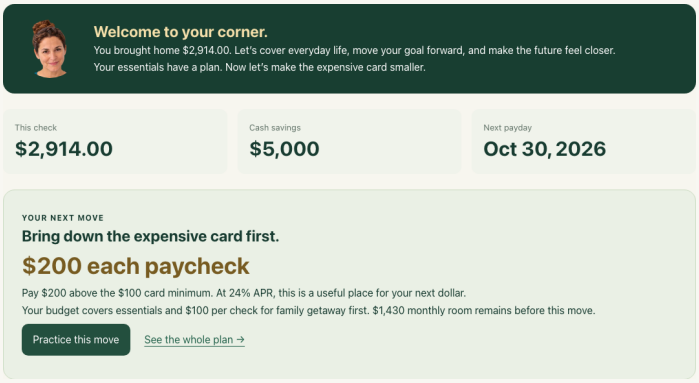
NURSING, HR & BENEFITS LEADERS

# A personal AI financial coach for your nurses.

Connect changing shifts, differentials and take-home pay with the life each nurse wants to build.

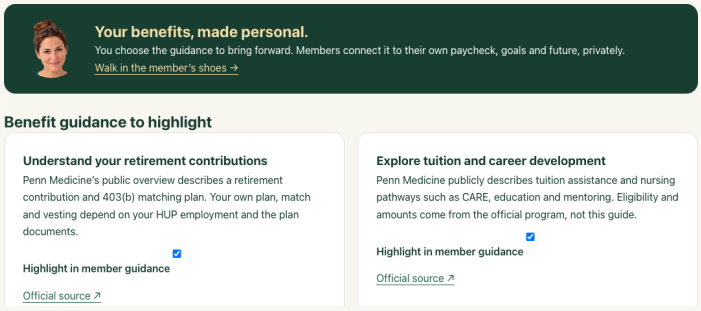
**Valerie · your AI coach**

## FOR NURSES



Example coaching journey with made-up finances.

## FOR YOUR ORGANIZATION



Example sponsor workspace with made-up data.

## Make the next paycheck useful.

Understand a check, explore an extra shift and put the result toward a reserve, debt or a goal. Valerie helps make the next choice easier to see.

## Put your benefits within reach.

Shape the agreed resources around your people. Dedicated account management supports setup, invitations, onboarding and adoption reviews.

## Bring benefits into real life.

Bring health coverage, education support and retirement resources into everyday decisions. Agree the supported pay and benefit scope with your team before launch.

## Adoption insights for your team.

Sponsors see aggregate adoption under the agreed reporting scope. Participation is voluntary. Retention is a hypothesis to test.

## A benefit for your whole workforce.

$10 per covered person per month, regardless of enrollment or use.
Private coaching, an account contact and aggregate adoption reporting.
Supported sources and onboarding are agreed before launch. Any organization-specific implementation work is confirmed separately.

**Let's talk: Dave Coles | Founder | dave@moneybadger.us**

Examples use made-up people and numbers, not a customer endorsement. Some capabilities are being built; supported scope and launch arrangements are agreed before launch. Educational digital coaching, not a human financial-adviser appointment. Educational, not financial advice.
We help you understand your money and build a plan that fits your life. You stay in control.
